Backend: Node.js, Express.js, MVC Architecture, REST API Design, JWT Authentication, Middleware

Database: MongoDB, Mongoose ODM, Firebase Firestore

Tools & APIs: Postman, Cloudinary, Firebase Auth/Storage/Hosting, Git, GitHub, VS Code, npm

Concepts: CRUD, JWT Stateless Auth, OOP in JavaScript, MVC Pattern, Open Source Workflow

PROJECTS

Udemy Clone — Full Stack React Application April 2026

React.js | Redux | Firebase Firestore | Cloudinary | SPA

- Built a full-stack course platform SPA with Redux state management across Home, Course Listing, Course Detail, and Dashboard pages.
- Integrated Firebase Firestore for real-time course/user/enrollment data storage and Cloudinary for thumbnail uploads with CDN delivery.

Recipe App — REST API Backend March 2026

Node.js | Express.js | MongoDB | Mongoose | JWT Auth | Postman | MVC

- Designed RESTful Recipe API with strict MVC separation — JWT stateless auth (register/login/protected routes) and full CRUD on recipe resources.
- Tested all routes in Postman collections: auth flow (register, login, token verification), recipe CRUD, and protected endpoint validation.

Multi-Page CRUD App — React Frontend March 2026

React.js | Redux | React Router

- SPA with multi-page CRUD (List, Create, Edit, Detail) using React Router and centralised Redux store (actions, reducers) across all routes.

Admin Panel — Node.js Backend February 2026

Node.js | Express.js | MVC Architecture

- Server-side admin panel in Express.js with strict MVC separation — routes, controllers, models in distinct layers with request-handling middleware.

Website Clone — React UI Project February 2026

React.js | CSS3 | Component Architecture

- Frontend SPA decomposing UI into reusable components (Navbar, Hero, Cards, Footer) with one-way data flow and fully responsive CSS3 layout.

Blog, MovieStore & BookStore — CRUD Apps January 2026

Node.js | Express.js | JavaScript ES6

- Three independent REST API CRUD apps for blog posts, movies, and books with clean MVC route/controller/model organisation.

Weather App December 2025

Vanilla JavaScript ES6 | HTML5 | CSS3 | OpenWeatherMap REST API

- Fetched live weather data via REST API using fetch() + async/await — dynamic DOM rendering with input validation and error handling.

EDUCATION
